SIMRAN BISHNOI

B.Tech CSE (Data Science) | Aspiring Software & Data Engineer

+91 92536 21281 | simranbishnoi@gmail.com | Hisar, Haryana, India

linkedin.com/in/simran-bishnoi- | github.com/Simranbishnoi | Live Demo: GamingHub

SUMMARY

Computer Science (Data Science) undergraduate with hands-on experience building full-stack applications and data-driven projects using Python, Java, SQL, React and FastAPI. Skilled in database design, REST APIs and data analysis with Pandas and Scikit-learn. Seeking an entry-level Software Engineer / Data role to apply technical skills and grow in a collaborative engineering team.

EDUCATION

Vellore Institute of Technology, Vellore, Tamil Nadu May 2026

B.Tech in Computer Science Engineering (Data Science) | **CGPA: 8.98**

Oxford Public School, Uklana Mandi, Hisar (CBSE) January 2023

Senior Secondary (Class XII) | **85.8%**

Oxford Public School, Uklana Mandi, Hisar (CBSE) January 2021

Secondary (Class X) | **93%**

PROJECTS

SwizzBank – Full-Stack Banking Management System 2026

Java, Python, FastAPI, REST APIs, PostgreSQL, SQLAlchemy, React, Git, Maven, JUnit, pytest

- Developed a banking system supporting account creation, deposits, withdrawals, balance inquiries and transaction tracking.
- Designed a PostgreSQL schema with relational constraints; planned a FastAPI + SQLAlchemy backend and React frontend with focus on validation, error handling and data consistency.

TerraWatch – AI-Powered Geospatial Platform 2026

Python, FastAPI, PostgreSQL, Google Earth Engine, Machine Learning

- Engineered a geospatial platform using Google Earth Engine and Sentinel-2 satellite imagery to automate deforestation detection and vegetation change monitoring.
- Implemented land-boundary anomaly detection with ML techniques, exposed through a FastAPI backend.

GamingHub – Gaming Web Application 2026

React, JavaScript, HTML, CSS | Live: gaming-hub-puce.vercel.app

- Built a responsive gaming-focused web interface with reusable React components and interactive UI elements; deployed on Vercel.

Retail Setu – College Hackathon Project 2025

Python, Pandas, NumPy, Faker

- Designed a retail data platform integrating sales, inventory and customer data, simulating real-time business operations with synthetic data.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, C++, SQL, JavaScript, HTML, CSS
- **Data & ML:** NumPy, Pandas, Matplotlib, Scikit-learn, Google Earth Engine
- **Web & Databases:** React, FastAPI, REST APIs, PostgreSQL, SQLAlchemy
- **Tools:** Git, GitHub, Maven, JUnit, pytest, Vercel

CERTIFICATIONS & ACHIEVEMENTS

- **Generative AI Mastermind Workshop** – Outskill: 3-day intensive on Generative AI fundamentals, AI tools and real-world use cases.
- **AWS Cloud Certificate** – Beginner level.

LEADERSHIP & EXTRACURRICULAR

Volunteer, Internal Smart India Hackathon – VIT 2025

- Assisted in organizing and running the event, coordinating logistics and communicating information to participants.
